Pavers add visual interest, function, and substance to any outdoor landscape. They enhance both intimate and extravagant areas, complement traditional and modern aesthetics, and serve small and large budgets. In this issue, Eagle Bay presents four distinct paver collections so you can easily choose a paver with the finish and pattern that best matches your unique style.

PAVERS
“Living in a wooded area, we especially liked Eagle Bay’s selection of natural colored pavers. They look elegant and really blend into the environment. Now we use our patio more than we do our living room.”

— JANA MCQUAID, HOMEOWNER
The Insignia Collection is a grouping of Eagle Bay’s most popular pavers that best achieves a natural and organic feel. All pavers in this collection have a textured surface, mimicking weather aging and naturally produced stone.

**CHATHAMSTONE**

**COTTAGESTONE TEXTURED**

**ESSEXSTONE**

**GRANDCAY TEXTURED**

**CIRCLESTONE TEXTURED**
ChathamStone

ChathamStone is a large, three-piece paver combination that creates an elegant tile-like surface for patios, walkways, and pool sides. Although recently introduced, ChathamStone is quickly becoming one of Eagle Bay’s most sought after pavers.
CottageStone Textured

Available in either a 6” x 6” square or a 6” x 9” rectangle, CottageStone Textured offers a multitude of hardscape pattern opportunities. With its dimpled-face finish, CottageStone Textured will make your final design convey artisan creation and perfect imperfections.

INSIGNIA COLLECTION — COTTAGESTONE TEXTURED

AVAILABLE COLORS

BULL RUN
JEFFERSON
RICHMOND
SUGARLOAF
JAMES RIVER
BLUE RIDGE
CHEAPEARL
CRIMSON
SARAH
SLATE

Available in 6” x 9” only.

CottageStone 6” x 9” Textured, James River Color

Available in 6” x 6” square or 6” x 9” rectangle.
EssexStone is Eagle Bay’s natural slate alternative. The three-piece system fits together in a combination of interesting angles and is designed to create a unique and stunning hardscape.

AVAILABLE ONLY IN JEFFERSON COLOR, AS SHOWN.

For EssexStone installation tips, visit eaglebypavers.com.
Bring style to your poolside, patio, or driveway with GrandCay’s popular five-piece paver system. The textured finish will give your project dimension, and the variety of paver colors available can lead to bold and interesting patterns.

**GrandCay TEXTURED**

- **GrandCay Textured, James River Color**
- **Wall: HighlandStone® Freestanding, James River Color**
- **Wall Cap: XLTM Cap, James River Color**
- **Column Cap: Light Top Rock Face Column Cap, Brown Color**

**INSIGNIA COLLECTION — GRANDCAY TEXTURED**
CircleStone TEXTURED

CircleStone is a five-piece paver system, available in numerous colors, that complements Eagle Bay’s entire product line. Use it to provide intimate and unique focal areas for both large and small spaces.

View larger color swatches on pages 84-85.
Eagle Bay’s Classic Collection features traditional paver shapes, patterns, and color combinations that match the sophistication of their homeowners. This timeless collection will endure as styles change and evolve.

**Brikstone Chamfered**

**Brikstone Flat Colonial**

**Cottagestone Chamfered**

**Kingsland Traditional**
Versatile in color and application, BrikStone Chamfered has become the top choice of many designers. This single stone, featuring beveled edges, can create classic patterns such as basket weave, running bond, and herringbone.
The distinct look of BrikStone Flat Colonial showcases a smooth surface and clean lines. Eagle Bay combines four complementary brick tones into one colonial color choice, making the design and installation process much easier.
Modeled after brownstone squares and rectangles, CottageStone Chamfered is crafted in 6” x 6” and 6” x 9” shapes. The beveled edges add dimension and maturity to your project and give it a Georgetown elegance.

Available Colors
- Sahara
- Jaimes Slate
- Saffron
- Shenandoah
- Richmond
- Bull Run
- James River

CLASSIC COLLECTION — COTTAGESTONE CHAMFERED

Pavers: CottageStone 6” x 9” Chamfered, Blue Ridge Color (available by special order only); Columns: HighlandStone® Column Unit, Blue Ridge Color; Cap: Cast Stone Column Cap, White Color
KingsLand TRADITIONAL

This three-piece modular system is ideal for high-traffic areas — yet maintains charm and warmth with its rounded edges. The pattern possibilities are endless, and designers will often contrast colors to create dynamic curb appeal.

finishing tip:
INCORPORATE AN EAGLE BAY FIRE PIT INTO YOUR PATIO PLAN TO ADD WARMTH ON COOL AUTUMN DAYS.

available colors

Bull Run
Jefferson
Richmond
Shenandoah
James River
Blue Ridge

KingsLand Traditional, Richmond Color
KingsLand Traditional, Richmond Color
Eagle Bay’s Old World Collection exudes warmth and richness for designs that seek to accomplish an aged and slightly rustic feel. And, as with all Eagle Bay pavers, you won’t need to compromise durability for beauty.

COTTAGESTONE ANTIQUED
EPICSTONE COBBLED
GRANDCAY COBBLED
KINGSLAND ANTIQUED
CIRCLESTONE ANTIQUED
CottageStone Antiqued is available in 6" x 6" and 6" x 9" shapes. The two sizes can work alone or together, and with its antiqued finish, your new hardscape will have the allure of time-worn stones.
Strong, large and designed to hold weight, this three-piece modular paver is a powerful choice. Coupled with its durability, the distressed face and edges give it a look of craftsmanship and age-old beauty.

AVAILABLE ONLY IN CHESAPEAKE COLOR, AS SHOWN
Exciting and random in design, this five-piece system is cobbled to feel historic and lived-in. There are numerous colors to choose from and endless design possibilities for your patio, pool deck, driveway, and more.

finishing tip:
PAIR TWO DIFFERENT EAGLE BAY FINEST COLORS TO CREATE VISUAL INTEREST IN A PATIO.
KingsLand Antiqued feels as though it was laid by hand in another era. The three-piece modular system is intentionally aged around the edges to create a hardscape that appears to have withstood the test of time.
CircleStone ANTIQUED

CircleStone Antiqued has been treated to provide your hardscape design with a vintage quality. This five-piece system complements most any project by creating a focal point for gathering areas.

CircleStone Antiqued, Sahara (Sahara is available by special order only); GrandCay Textured, James River Color

finishing tip: PAIR A DIFFERENT EAGLE BAY㎜ Paver with CircleStone to EMPHASIZE A SPACE.
Our signature Bay Collection can satisfy your design aesthetics while limiting your ecological footprint. These Eagle Bay pavers significantly help filter contaminants and reduce runoff. We are proud to say this is a win-win for homeowners and our natural landscape.

ECOBAY
SF RIMA™ CHAMFERED
TURFSTONE TEXTURED
EcoBay, James River Color

With their traditional shape, EcoBay permeable pavers can fit nearly any design. Unlike traditional stone or pavers, this two-piece system will effectively reduce the amount of runoff that can pollute our streams, lakes, rivers, and ultimately the Chesapeake Bay.

For more information about stormwater management with permeable pavers, visit eaglebaypavers.com.
SF Rima™ is a single-unit permeable paver with a flat face and beveled edges. It is a durable paver that can withstand heavy traffic, making it well suited for a variety of landscape and stormwater solutions.
TurfStone can be a visual feature in your hardscape or serve a more functional role. It has a honeycomb shape that can be filled with gravel or grass. This allows rainwater to filter through slowly and evenly, resulting in the remediation and stabilization of soil erosion.

Available only in gray color as shown.
“Eagle Bay’s retaining wall and paver options allowed me versatility in design as well as the durability I needed.”

— ERIC SUNDBERG, HOMEOWNER
Eagle Bay walls add structure, protection, and decoration to your hardscape. Our products are tested for strength and durability, and we have perfected a collection of color blends so you don’t have to compromise on style. Columns and caps are available for each wall unit.
Dublin™ Freestanding mimics centuries-old boundary walls found throughout Dublin, Ireland. These tumbled stones add charm to any hardscape project. The same single unit is used for the wall, column, and caps, making estimating and assembly a snap.
Each piece of the Highland Stone® Freestanding wall system features a slightly rough finish, giving wall projects up to three feet a secure and natural feel. Stones are available in 6” or 3” heights and a variety of widths (see page 92).
The Highland Stone® wall system is Eagle Bay’s most popular retaining wall for projects up to four feet. The rough finish, visible on one side, blends into its surroundings and is available in varying heights and widths. Blend multiple sizes to give a more natural feel (see page 92).
Aspen Stone retaining walls are lightweight and easy to handle, perfect for smaller spaces and patio or garden walls. The rough-hewn texture, available in four colors, is visible on one side and works for projects up to two feet high.

finishing tip:

For your Aspen Stone® Wall projects, select Eagle Bay’s Aspen Stone® Caps. See page 55.
The Diamond® 10DS retaining wall system is the perfect choice when your project calls for classic, clean lines. It has a rear-lip locator that works exceptionally well for walls, terraces, and gardens. Choose a straight edge or curved design with this flexible block.
Diamond Pro® Retaining

With the proven strength and a natural-stone appearance, the Diamond Pro® and Diamond Pro Stone Cut® retaining wall systems are the perfect choice for larger-scale projects that demand beauty.

AVAILABLE ONLY IN JAMES RIVER COLOR, AS SHOWN

finishing tip:
FOR YOUR DIAMOND PRO® WALL PROJECTS, SELECT EAGLE BAY’S SNECKS AND CORNER UNIT. SEE PAGE 95.
Your outdoor space will feel complete when all the details and finishing touches have been chosen and installed. Fire Pit Kits, Coping Stones, caps, column units, and steps are all available through Eagle Bay. We also provide suggestions on the best products to maintain and clean your hardscape so the beauty lasts for years.
Highland Stone Fire Pit Kit, James River Color; Pavers: KingsLand Traditional, Richmond Color

Highland Stone Fire Pit Kit, Jefferson Color with Gray Ring Cap; Wall: Highland Stone Freestanding, Jefferson Color; Edging: CopingStone, Jefferson Color

Our easy-to-build Fire Pit Kits create the perfect setting to enjoy a cool evening or a crisp fall day. Everything you’ll need to build a beautiful freestanding fire pit is included. This kit comes in two of our most popular colors, James River and Jefferson, and is conveniently shipped on one pallet.

Optional two-piece steel ring available upon request.

DIAMETER INSIDE: 46"; DIAMETER OUTSIDE: 63"; HEIGHT: 25.125" (WITH COPING)
Aspen Stone® Fire Pit Kit, James River Color; Pavers: Cottage Stone 6" x 6" & 6" x 9" Antiqued, Blue Ridge Color; Wall: HighlandStone® Freestanding, James River Color

DIA: 28"; DIA: 3'; HEIGHT: 20"

Fire Pit Kit includes blocks, fire pit bowl, log support grill, spark screen, and spark screen tool. Diameter Inside: 28", Diameter Outside: 43", Height: 20"

The rough-hewn texture of Aspen Stone® adds natural charm to any outdoor space. This easy-to-assemble kit comes prepackaged with Aspen Stone® blocks, log support grill, spark screen, and spark screen tool.
OutdoorFireplaces & Ovens

Pre-engineered for strength and virtually maintenance free, these traditional fireplaces extend your precious summer season. All products are modular and easily lend themselves to customization. All outdoor products can be veneered with man-made or sliced stone.

OUTDOOR FIREPLACE

With a traditional fireplace look, this product includes firebox, smoke chamber, and two or three feet of solid chimney.

HEIGHT WIDTH OPTIONS
30” 36” 42”

ARCHED FRONT OUTDOOR FIREPLACE

This design features an arch detail and is popular among homeowners. The solid-block chimney comes standard.

HEIGHT WIDTH OPTIONS

CARE & MAINTENANCE

HARDSCAPE SEALANTS & CLEANERS by TechniSeal®

Choose from gloss or matte finishes to protect your hardscape against stains and make cleaning easier.

GLOSS FINISH PROTECTIVE SEALANTS

<table>
<thead>
<tr>
<th>VUF1 METAL LOOK — SIZE 1 GAL., 5 GAL.</th>
</tr>
</thead>
</table>
| Recommended for driveways, parking lots, patios, and walkways. Enhances the color of pavers with a gloss finish. Optimal alkyd alkylsiloxane.

SEMI-GLOSS FINISH PROTECTIVE SEALANTS

<table>
<thead>
<tr>
<th>VUF1 CLEAR LOOK — SIZE 1 GAL., 5 GAL.</th>
</tr>
</thead>
</table>

MATTE FINISH PROTECTIVE SEALANTS (NON-FILM FORMING)

<table>
<thead>
<tr>
<th>VUF1 NATURAL LOOK — SIZE 1 GAL., 5 GAL.</th>
</tr>
</thead>
</table>
| Recommended for pool decks, walkways, steps, patios, and retaining walls. Invisible finish. Penetrating: will not make surface more slippery.

<table>
<thead>
<tr>
<th>VUF1 COLOR BOOST — SIZE 1 GAL., 5 GAL.</th>
</tr>
</thead>
</table>
| Recommended for pool decks, walkways, steps, patios, and retaining walls. Enhances the color of pavers with a matte finish. Penetrating: will not make surface more slippery.

HARDSCAPE CLEANERS by TechniSeal®

Your patio or driveway will get a lot of use, but it doesn’t have to show. These cleaners and accessories make it easy to remove oil, rust, tar, efflorescence and more.

ORGANIC JOINT STABILIZERS by Envirobond®

LOOK FOR THESE Logos

Keep your patio or driveway looking great year after year with these high-quality, easy-to-use sealants, hardscape cleaners, and accessories.

EAGLE BAY EXTRAS — ACCESSORIES & CARE
Pulling all the pieces together for your future hardscape project can be intimidating. Where to start?

In this section, we provide additional information that will get you closer to your dream design: colors, measurements, patterns, and more.
PAVER COLORS

Selecting a paver color is one of the most important and exciting aspects of your design, and Eagle Bay has worked hard to create a color collection that gives you plenty of choices. For the most accurate color representation, visit your local Eagle Bay Dealer to request a sample.

The colors below are made with Permavision™, a vibrant layer that ensures lasting color, minimizes stone particles, and provides a smoother stone surface.

Eagle Bay has attempted to represent our colors as accurately as possible; however, variances will naturally occur as a result of the printing and manufacturing processes. In all situations, we recommend viewing the actual product before choosing a color and ordering product.
WALL COLORS

Eagle Bay wall colors are designed to blend in nicely with your surrounding landscape and complement the paver collections featured in this catalog. For the most accurate color representation, visit your local Eagle Bay Dealer to request a sample.
**PAVER SPECIFICATIONS**

Installer note: Embossed or stone-cleft pavers in the Insignia Collection, when compacted, should be protected with a rubber mat.

All paver sizes are nominal and should be pre-measured when doing a job for which exact dimensions are critical. Actual stone colors should be viewed by the homeowner before purchasing.

Samples can be requested by visiting your local distributor.
UNDERSTANDING THE DIFFERENCES AMONG PAVER FINISH TYPES AND EDGE TYPES

While cost, durability, and maintenance are all important factors in choosing a material for your hardscape, we think you’ll agree that the design choices are the most exciting thing about Eagle Bay concrete pavers. Within our paver collections, we offer several finishes to help you get just the look you want.

FINISH STRONG

You’ll want to start by choosing the overall look you want for your hardscape project. Our pavers are manufactured to resemble many other materials like brick, cobblestone, natural stone, flagstone, slate, and concrete (with added cost, maintenance, and sustainability benefits). We believe the details matter, so we have developed manufacturing processes that give our pavers a number of different textures to re-create natural weathering. Currently, we offer five distinct paver finishes: Antiqued, Chamfered, Traditional, Cobbled, and Textured. Each finish features its own combination of surface and edge styles designed to create a specific look and feel.

SURFACE FINISHES

- **Antiqued**: Flat surface, worn edges
- **Cobbled**: Mottled surface, worn edges
- **Chamfered**: Flat surface, beveled edges
- **Traditional**: Flat surface, rounded edges
- **Textured**: Dimpled surface, rounded edges

EDGE FINISHES

- **Beveled**: Chamfered
- **Rounded**: Traditional & Textured
- **Worn**: Cobbled & Antiqued

- **HIGHLAND STONE® ROCK FACE COLUMN CAP**
  - 32" x 32" x 4.5" (tall)

- **HIGHLAND STONE® FLAT ROCK FACE**
  - 32" x 32" x 2.125" (tall)

### COLUMN CAPS

- **COLUMN CAP CAST STONE**
  - Cast Stone

- **COLUMN CAP LIGHT TOP ROCK FACE**
  - Cast Stone

- **COLUMN CAP PEAKED ROCK FACE**
  - Cast Stone

- **COLUMN CAP FLAT ROCK FACE**
  - Cast Stone

### ADDITIONAL ACCESSORIES

- **LANDSCAPE STEP**
  - 48" x 14" x 4" (tall)

- **1/4" FIRE PIT RING CAP**
  - 80" diameter x 1/4" thickness x 2.375" (tall)

### HOW TO INSTALL HIGHLAND STONE® FIRE PIT KIT

1. **FOUNDATION:**
   - **RECOMMENDED BY EAGLE BAY — COMPACTED GRAVEL BASE:** Place and uniformly compact the gravel base (crushed stone no larger than 3/4”). Dense-graded aggregate base should be compacted using a vibratory plate compactor or hand tamper. A 4" thick gravel base is recommended and should extend beyond the Highland Stone® Fire Pit a minimum of 3" on each side. The top of the leveling pad should be at least 3" below grade.

2. **BUILDING ADDITIONAL LAYERS OF BLOCK**
   - Make sure the first layer of block is perfectly leveled before building additional layers. Using concrete-safe adhesives, glue the second row of blocks to the first row. It is important to stagger the joints as much as possible on every course. Make sure not to line up any two small units on top of the small units below. There are enough units to build 7 layers of block, which would make the fire pit roughly 21" tall plus coping.

3. **INSTALLATION OF WEATHERED CAP & OPTIONAL METAL FIRE RING**
   - Once the fire pit is at the desired height, use a concrete adhesive to secure the four radius cap units. Add crushed stone or lava rock to raise the fire bed up to your preferred height. If you choose the optional metal fire ring, please insert before capping the fire pit.

**SAFETY TIPS:**

- The fire pit is for outdoor use only.
- Make sure to assemble the fire pit away from surrounding structures and make sure nothing is directly above the fire pit that is a potential fire or injury hazard.
- Before beginning installation, please contact your municipality to obtain information for fire pit installation regulations. It is very important to check local codes.

For more installation details along with time-lapse video on our website: eaglebaypavers.com.
HOW TO INSTALL A PATIO USING PAVERS

IF YOU WANT TO EXPAND YOUR INDOOR ROOMS TO THE GREAT OUTDOORS — where you can enjoy space to drive, entertain, or just relax, consider installing a patio. Anyone can install a patio, but because there is lifting, hauling, digging, and cutting involved, it is important to wear work gloves, knee pads, a back support belt, safety glasses, and ear plugs as well as to practice proper lifting forms.

DESIGNING AND INSTALLING YOUR OWN PATIO CAN BE COMPLETED IN SEVEN STEPS:

1. Determine the area to be paved and how much material will be needed. Choose paver shape and pattern. Estimate quantity of material for paved area.

2. Have utilities marked and area to be paved. The heavier the surface load, the deeper the base excavation. Be sure you have plans for relocating the soil and soil. Compact exposed base area.

3. Install geotextile and base aggregates. Turn cloth up at sides of base. Place aggregates over cloth to required depth and compact to 95% solid. Set posts and stringlines for final base grades and finished paver elevations.

LAYOUT AND INSTALLATION

4. Install C-33 concrete bonding sand at a depth of 1", and screw smooth to set pavers to finished elevation.

5. Place pavers on screwed sand base. Use stringlines to keep pattern straight. Set hand-light joints. Cut pavers in areas as needed to complete pattern.

6. Set plastic edging tight against all exposed paver edges and spike firmly every 24" for walkways and 12" for driveways and curves. Edging works best if set on an aggregate base after trimming sand, setting bed flush with outside edge of pavers.

7. Make one pass over entire area with a plate compactor, then swab C-33 concrete sand or other selected joint material into all joints, and compact again to complete interlock process. Refill to desired level after early weathering. Swab up, clean up, and enjoy your new paver installation.

HOW TO INSTALL A RETAINING WALL

QUICK COURSE ON COURSES

To complete your project, you will need the following hand tools: shovel, tape measure, hammer, chisel, carpenter’s level, stakes, string line, garden hose, safety glasses, gloves, pencil, and square. You may also need a skid loader, compactor, vibratory/roller, and a circular cut-off saw with a masonry blade. Other requirements include a 4” diameter flexible polypropylene pipe (drain line), a supply of sand and gravel (3/4” or smaller aggregates with fines) for the base, and gravel (3/4” free-draining aggregate without fines) to use as backfill.

DIRECTIONS:

1. Using a shovel or a skid loader, dig a trench about 24" wide and deep enough to fit the required amount of buried block and compacted base. For walls up to 4’ high, bury one layer of units. For walls taller than 4’, consult a qualified engineer for design information. Total wall height includes the height of any buried layer.

2. Firmly compact the soil in the bottom of the trench. Lay 6” of compactive base (sand and gravel) in the bottom of the trench and compact (Fig. A).

3. Place the first layer of Anchor™ units without lips on the prepared base. Lips must be manually knocked off units before placement (Fig. B). Position the units side by side in full contact with the base. Level in both directions using your carpenter’s level to level front to back and side to side.

4. Continue assembling additional layers by placing units in a staggered relationship to the layer beneath (running bond), pushing each unit forward until secure (Fig. C). NOTE: Use gravel (free-draining aggregate) to backfill each additional course as it is installed.

5. Place drain line behind the wall at grade to allow water to drain from the backfill (Fig. D). Outfit the drain line through the wall at every low point, or every 50’ of wall length, and around the ends of the wall. Backfill with free-draining gravel 12’ behind the wall. Fill in the voids. Organic soil or clay-type soil is not recommended for backfill material.

6. Fill any remaining areas behind the wall with soil (Fig. E). Compact every 8”. Repeat steps 4, 5, and 6 until the wall reaches the desired height. For walls taller than 4’, consult a qualified engineer for design information concerning proper design, backfill, and geosynthetic reinforcement.

7. Firmly compact native soil behind the wall (Fig. F). Do not compact directly on top of the units.

8. You may need partial blocks. To split a block, use a hammer and chisel to score the block on all sides. Pound the chisel on the score line until the block splits. If the block does not split easily, you may need to use a circular cut-off saw with a masonry blade. Read and understand the operating manual before using a saw. Always wear eye protection when splitting blocks.

Refer to the Estimating and Installation Manual for instructions on installing freestanding walls and special applications. Copies are available at authorized Eagle Bay dealers.
These are intended as a guide for preliminary pattern design only.

**COTTAGESTONE**

- 90° HERRINGBONE (6" x 9" ONLY)
- 90° MOD. HERRINGBONE (40% 6" x 6" + 60% 6" x 9")
- RUNNING BOND (4" x 4" DK)
- MOD. RUNNING BOND (40% 6" x 6" + 60% 6" x 9")
- I-PATTERN (25% 6" x 6" + 75% 6" x 9")

**KINGSLAND**

- EPICSTONE

**RANDOM**

- NOT A SET PATTERN. EVEN PIECE DISTRIBUTION IS NOT POSSIBLE.

**BRIKSTONE**

- 90° HERRINGBONE
- 45° HERRINGBONE
- BASKETWEAVE

**CIRCLESTONE**

- 9.35' DIAMETER

**RUNNING BOND**

- NOT A SET PATTERN, EVEN PIECE DISTRIBUTION IS NOT POSSIBLE.

**PLEASE NOTE:** Eagle Bay patterns are intended as a guide for preliminary pattern design only. It is the designer’s or contractor’s responsibility to verify and calculate the unit sizes and package quantities necessary to successfully complete their installation. Patterns marked RANDOM are not set, and even piece distribution is NOT possible.

LIFETIME TRANSFERABLE WARRANTY

WE STAND BEHIND OUR PRODUCTS WITH A LIFETIME PRODUCT WARRANTY.

Eagle Bay is proud to certify that our paving stones and retaining walls meet the latest industry standards in the United States. All Eagle Bay landscape products comply with and surpass all applicable standards set by the ASTM C936 (American Society for Testing and Materials) and NCMA (National Concrete Masonry Association).

Eagle Bay offers a transferable lifetime warranty on the structural integrity of all paving stones and retaining wall units it manufactures. It covers any disintegration and/or decomposition of the above-mentioned products resulting from natural causes and the abnormal deterioration of the surface due to the use of sodium chloride (NaCl) such as de-icing salt. If products prove defective, we will replace these units. Eagle Bay’s responsibility is limited to its manufactured products only and not to costs related to the installation of those products. We will honor this transferable warranty with a proof of purchase (invoice or delivery slip).

Visit eaglebaypavers.com for full warranty information.

DETAILS

PRINTED COLOR SWATCHES

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogues, books, color swatch books, and online photos. However, Eagle Bay cannot guarantee specific color matching. Our colors and walls can vary slightly in color batch depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and should be expected to be an exact match. Final color selection should be made at your local dealer from stock product. Eagle Bay always recommends immediately verifying the product and color upon receipt. There are no returns or exchanges. Contact your local dealer before confirming your project. Installation of the product constitutes its acceptance.

EFFLORESCENCE

Efflorescence is a whitish, powdery deposit that can appear on the surface of concrete pavers. When cement hydrates, a significant amount of calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide in the air to form water-insoluble calcium carbonate, called efflorescence. Efflorescence does not affect the structural performance or durability of concrete pavers. Eagle Bay includes admixtures in its concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Eagle Bay does not warrant concrete pavers that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months of installation. It may remain for months or wear away. Efflorescence may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult with a chemical company that specializes in efflorescence-removed chemicals.

COMPACTOR AND SNOW REMOVAL

Eagle Bay pavers with smooth or broad surfaces — EpicStone, GrandBay, CircleStone, CircleStone Plus, CircleStone Plus and EpoxyStone — have high and low points on the surface that lend a more natural aesthetic appeal to the pavers. However, pavers with broad surfaces are susceptible to surface scuffing when being compacted in place with plate compactors. Therefore, these paver types should always be compacted immediately verifying the product and color upon receipt. There are no returns or exchanges. Contact your local dealer before confirming your project. Installation of the product constitutes its acceptance.

Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. Eagle Bay will not be held responsible for damage to pavers caused by the misuse of compaction or snow removal equipment, leaving scuff marks, or burns on pavers.

NOTE:

This warranty does not apply to any breakage, chipping, or other deterioration caused by improper design or installation that does not comply with applicable codes, the ICPI (Interlocking Concrete Pavement Institute), NCMA (National Concrete Masonry Association) and recognized work procedures. Please visit www.icpi.org or www.ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer, or any third party.
